Application (R/V) / Data Analytics / Information Technology / Data Science and
Analytics - Programming with C**

P. Pages : 1

Time : Two Hours

AK - 4443

Max. Marks : 30

- Notes :
1. All questions are compulsory.
 2. Draw neat diagrams wherever necessary.
 3. Assume suitable data wherever necessary.

1. Write answers in one or two lines solve any six:

- i) What is algorithm? ✓
- ii) What is constant? ✓
- iii) What is operators?
- iv) What is looping?
- v) What is formal argument?
- vi) What is global variable?
- vii) What is function? ✓
- viii) What is function's call by reference? ✓

6

2. Answers in short any two of the following [3 marks each]:

- A) Explain the type of programming languages. ✓
- B) Explain the history of C language. ✓
- C) Explain the advantages of C language. ✓
- D) What is symbolic constant? Explain with suitable example.

6

3. Explain in detail any one of the following:

- A) Explain the following unformatted statement
 - i) `putch()`
 - ii) `putchar()`
 - iii) `puts()`
- B) What is for loop? Explain nested for loop with example.

6

4. Answer in short any two of the following [3 marks each]:

- ✓ A) What is array? Explain the declaration and initialization of one dimensional array.
- B) What is nested structure? Explain with suitable example.
- C) What is pointer? Explain declaration and initialization with suitable example.
- D) Write a program to read and print a value using pointer variable.

6

5. Explain in detail any one of the following:

- ✓ A) What is function call by value and call by reference with suitable example.
- B) What is string function? Explain the functions `strcmp()` and `strcat()` with example.
